

## **THE ASHEVILLE**

**PRICED FROM THE \$180s PLUS LOT**

Gone are the days of drab, “box-like” construction in modular home design. Today’s modular homes offer great curb appeal, open floor plan design, and all the features and options you would see in on-site construction. The difference is the price and time to build.

This home has 2,172 square feet of space on the main floor with an optional 1,501 square feet of partially finished space on the second floor with amazing potential. Finish it now or wait until later, your choice. Since the home arrives at the building site over 90% complete, this home can be ready for occupancy in about 2 months, depending on features.

MODEL: 773

FIRST FLOOR:  
 41'-6" x 54'-0"  
 TOTAL = 2172 SQ FT

UNFINISHED UPSTAIRS:  
 27'-0" x 54'-0" + DORMER  
 TOTAL = 1501 SQ FT

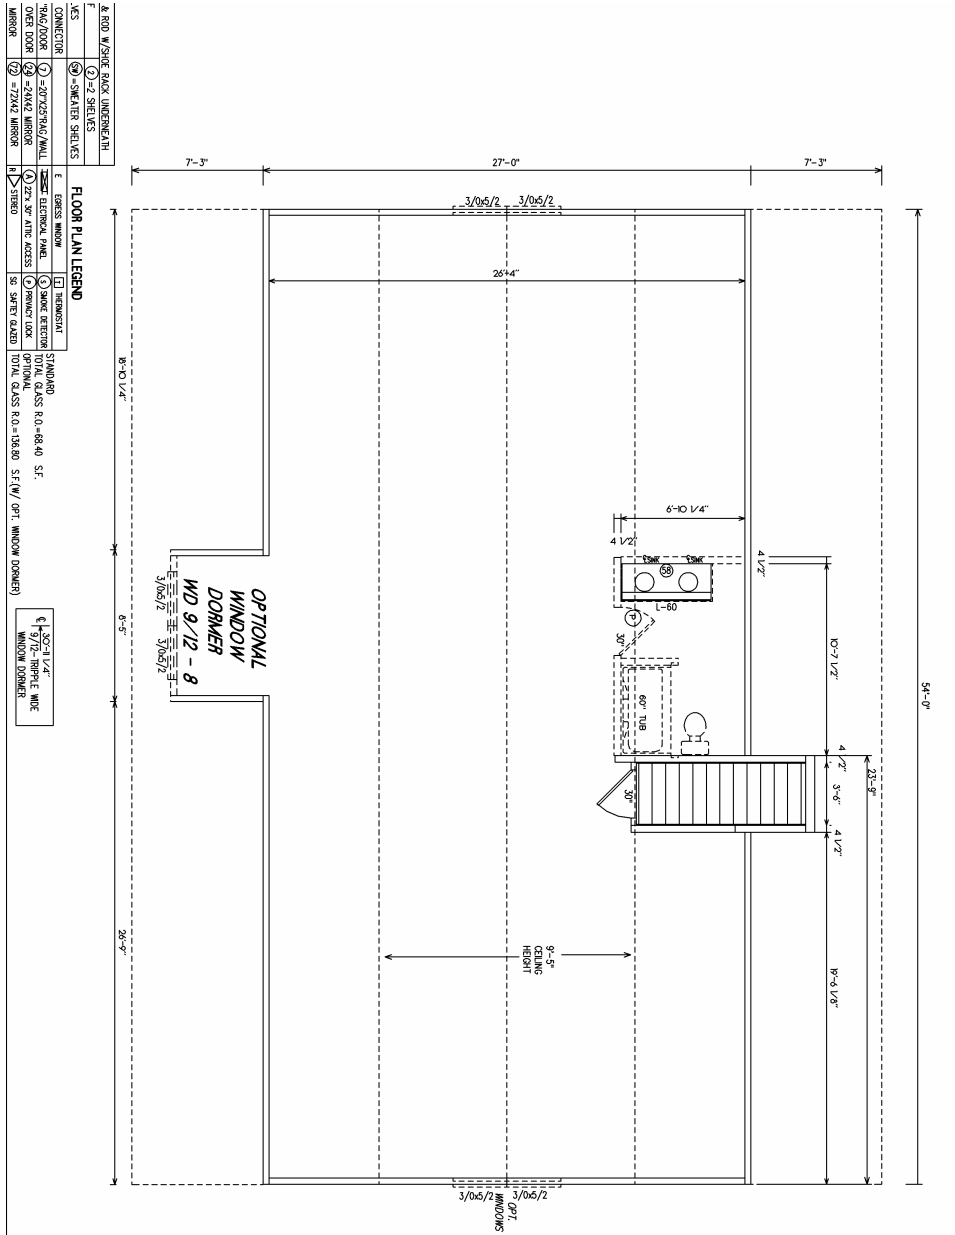

**TOTAL = 3673 SQ FT.**

## **Standard Specifications as of January 1, 2010**

The following is a list of the common features in most of our homes we build. This should be used as a guide for you to gauge the quality of the features that are typical in the homes we build. Because things like lot topography and lot location can impact costs for land clearing, utilities, driveway size, foundation size, etc., final house plan pricing is derived once these items are known.

### **Permits and Survey**

- All permits for work to be performed per state and city code are included
- County and/or subdivision new home impact fees, if applicable, are not included
- As-built survey for house is included

### **Land Clearing and Excavation**

- Land clearing will be done as needed for site excavation as determined by the Builder
- Home “footprint” will be marked prior to land clearing for approval by POA

### **Water and Sewer**

- Evaluated on individual basis based on type and availability of services.

### **Foundation**

- Footings will be 10" x 20" 3,000 psi concrete with two rows of rebar
- Footing drains will be a 4" diameter perforated plastic pipe embedded in crushed stone, covered in filter fabric and laid around the perimeter of the home
- Foundation walls will be waterproofed with an asphalt-based coating. Foundation drain inside foundation
- Modular brick with rake joint for foundation walls
- SolarTec™ foundation vents, or similar
- 6 mil plastic vapor barrier in crawl space

## **Structural**

- 2x6 Exterior Walls
- 2x4 Marriage Walls
- 2x4 Interior Walls
- 1/2" Drywall Glued & Screwed to Walls
- 10" Engineered Truss Floor System
- 6/12 Roof Pitch with Roof Trusses
- 12/12 Roof Pitch with Roof Trusses on Cape Cod Models
- 9/12 Roof Pitch with Roof Trusses on Bonus Ranch Models
- 3/4" Tongue & Groove OSB Floor Decking
- (Attic Decking Included on 12/12 Cape Cod & 9/12 Bonus Ranch Models)
- 12" Overhangs
- R-30 Roof Insulation
- R-19 Wall Insulation

## **Exterior**

- Vinyl Siding
- Architectural Shingles
- OSB Exterior Sheathing
- 6" Aluminum Fascia
- Vinyl Vented Soffit
- Decorative Front & Rear Exterior Lights
- Single-Hung Low E Vinyl Windows w/ Screens
